

Glutolin N standard wallpaper adhesive

High quality methylcellulose wallpaper adhesive

Instructions for use: *Glutolin N* is suitable for hanging light to heavy weight paper wallpaper.

Technical specifications:

Components:	Methylcellulose
Density:	approx. 0.31 g/cm ³
pH-value:	7-8
Solubility:	ready for use in about 20 minutes
Usage:	approx. 200 ml/m ²

Surface preparation: The surface to which the wallpaper is to be applied must be dry, stable and free of dust, grease etc. Remove old peeling wallpaper and paint using *Glutosolv TA wallpaper remover*. Tidy up cracks, holes and uneven areas with *Glutofill WF filler* or *Glutofill WG super bonding filler*. Pre-treat strongly absorbent, abrasive and chalky surfaces with *Glutogrund LF Deeply Penetrating Primer*.

Application: Add *Glutolin N* to cold, clean water, stirring vigorously and continue to stir for a short period. After about 20 minutes, stir vigorously once more. Apply *Glutolin N* to wallpaper evenly, fold and allow to cure. After an appropriate curing period, hang wallpaper. Always follow the wallpaper manufacturer's instructions. Remove excess paste with a damp cloth.

Tool cleaning: Wash in cold or hot water. Protect, clean and care for hands in accordance with the Glutoclean skin care plan.

Mixing ratio:

for	Mix	Amount of water per 125g pack	125g pack covers
Pre-adhesion	1 : 80	10 l	75 m ²
Wallpaper	1 : 60	7.5 l	40 m ²

Storage: Store in a cool dry place.

Important information: Please see the EU Safety Data Sheet for all safety -related data (EU-CLP)
