

Glutofix 600 – for labeling and handicraft

Preservative- and solvent-free methyl cellulose adhesive

Instruction for use: *Glutofix 600* is ideally suited for sticking paper and cardboard materials such as labels, posters, cardboard and wallpapers. Perfect as binding agent for papier-mâché.

Technical specification:

Components:	Methylcellulose
Density:	0,5 g/cm ³
pH-value:	6-7
Solubility:	ready for use in about 20 minutes

Application: Add *Glutofix 600* to cold and clear water, stirring vigorously and continue to stir briefly. After about 20 minutes, stir vigorously once more.
Apply the adhesive with a brush to the material and stick it immediately.
Glutofix 600 dries colourless and stays water-soluble.

Mixing ratio:

for	Ratio	Amount of water per 125 g pack
Pasty	1:30	4 l
Thick	1:40	5 l
Liquid	1:50	6 l

Storage: Store in a cool dry place.

Important information: Please see the EU Safety Data Sheet for all safety -related data (EU-CLP)

Available size: Box 125 g Art. no. 062801074
