

Glutolin ECC extra clear

Special adhesive for wallcoverings

Area of application:

Glutolin ECC is a special extra crystal clear adhesive for almost all types of wallpapers and wallcoverings – p. ex. heavy wallpapers like non-woven, textile, vinyl, embossed and metal wallpapers. Ideally suited for dark and matt wallcoverings.

Characteristics:

- Ideally suited for dark or matt wallcoverings and all heavy wallpapers
- Crystal clear during application and after drying
- Easy to remove
- Solvent-free
- pH-neutral

Technical specifications:

Components: specially modified starch, water, additives
 Density: approx. 1,05 g/cm³
 pH-value: approx. 7

Preparation of the surface:

The surface must be dry, stable, uniformly absorbent and free separators (dust, grease etc.). Remove old wallpapers and non-adherent coatings. Patch cracks and holes with Glutofill WG or WF. Pre-treat sanding, chalky and strongly absorbent surfaces with Glutogrund LF, and surfaces with irregular colour shades with Glutogrund TP.

Application:

Apply the adhesive evenly either on the back of the wallpaper or on the wall with a brush or roller depending on the wallpaper manufacturer's instructions. Hang the wallpaper neatly on the surface and press evenly and without bubbles. Eventual residues of the adhesive at the face of the wallpaper are very easy to remove. In the case of later change of the wallpaper, the wallpapers and – coverings glued with Glutolin ECC can be removed with wallpaper remover as p. ex. Glutolin TA.

Indications:

In case of wallpapers with paper as support material, dilute the adhesive with 20 % of water. Do not use at temperatures below + 5 °C. Note the technical data sheet. Clean tools in water after use.

Consumption:

ca. 175 g/m²

Storage:

Store well sealed in a cold place out of reach of children. Frost-resistant up to – 15 °C during storage and transportation.

Disposal:

Only recycle completely emptied containers. Dispose product residues in accordance with waste code EWC 08 04 10.

Preservatives:

Contains: Benzoisothiazolinone, Methylisothiazolinone. May produce an allergic reaction.

Important Information:

Please see the EU Safety Data Sheet for all safety -related data (EU-CLP)
