

Glutoclean C hand cleaner

Instructions for use:	Glutoclean hand cleaner is a hand cleaning crème in the form of an oil and water emulsion for fast, effective, gentle hand cleaning	
Technical specifications:	Components::	Tensides, PE plastic abrasive agent, oils (in part of natural origin), lanoline, water
	Density:	Approx. 0.84 g/cm ³
	pH-value:	Approx. 8 – skin neutral
Application:	Rub a small quantity of Glutoclean hand cleaner into dirty hands thoroughly (without adding water) and once dirt is dissolved, rinse well with water or wipe off with a cloth and dry carefully. About 3 ml of Glutoclean hand cleaner (the quantity dispensed by the dispenser) is usually enough to clean one pair of hands.	
Characteristics:	<ul style="list-style-type: none">* cleans right down to the pores* abrasive agent gentle on the skin* with biodegradable ingredients* with moisturising lanoline	
Storage:	Store in a cool place, protect from frost. Ensure that the container is properly closed.	
Important information:	Please see the EU Safety Data Sheet for all safety -related data (EU-CLP)
