

## Glutoclean AF Anti Fungicidal Additive

**Instructions for use:**

*Glutoclean AF Anti Fungicidal Additive* can be used to easily and lastingly protect water-based products – such as emulsion paints, wallpaper adhesives, distempers, primers, etc. – against microbial infestation. *PUFAS Fungicidal Paint Additive* is also ideally suited for renovating surfaces before the subsequent wallpapering and painting works. *Glutoclean AF Anti Fungicidal Additive* can be used on all absorbent surfaces – such as plaster, stone, concrete, aerated concrete, masonry, etc. Not suitable for treating wood.

**Technical specifications:**

Components: Derivative of isothiazoles, additives and solvent  
Density: approx. 1.1 g/cm<sup>3</sup>

**Application:**

As an additive to emulsion paints, wallpaper adhesive and similar water-based products:

Stir 250 ml *Glutoclean AF Anti Fungicidal Additive* into 10-15 l emulsion paint or similar and use as usual.

As surface renovation for interior and exterior use:

Clean the surface. Thin 250 ml *Glutoclean AF Anti Fungicidal Additive* with 7 l water. Brush on plenty of the mix to the affected areas, twice, wet on wet, and leave to completely dry before continuing.

**Storage:**

Store in a cool, but frost-free place. Keep container tightly closed.

**Available size:**

250 ml PE bottle Art. no. 065411074

**Important information:**
